Extract 1: Recommendation

ECTEL proposes to recommend that all currently approved interconnection agreements should be published.

1) ECTEL invites views on its recommendation that all currently approved interconnection agreements should be made available for download on ECTEL and NTRC websites.

Karib Cable Comments 1: We are in agreement to publish on-line Part I of the Interconnection Register that lists approved Interconnection Agreements and to publish Part III the contents of the interconnection agreements excluding those directed by the Commission to be kept confidential and which shall be open for inspection by the public.

Extract 2: Recommendation

ECTEL proposes to recommend that all parts of approved interconnection agreements should be published on the Commission's website and made available to the public for inspection at the Commission's offices.

2) ECTEL invites views on its recommendation that all parts of currently approved interconnection agreements should be published

Karib Cable Comments 2: We are not in agreement to publish all parts of the approved interconnection agreements. Part II of the register contains portions of interconnection agreements, which the Commission has directed to be kept confidential. We believe that the reasons for this still stand. We do however agree that copies of approved interconnection agreements with synthetic data replacing the confidential data be published. Should any prospective new entrant wish to obtain more details then they may make application to their relevant NTRC who may provide information at their discretion.
