

Tag line: Education for Vincentian youths by Vincentian youths.

A very critical problem within the Ministry of Education is the lack of resources, and teaching ideas among schools in Saint Vincent and the Grenadines. It is critical for all students to have access to the same educational information. In spite of this there are some students who have limited access to resources. Resources should be an easily accessible tool by all students. A website where students and teachers can post educational activities and information where students can share their feedback and make comments on the given information can help to solve this problem.

Having said that, resources and teaching ideas can be shared among Vincentian youth. It would be important that all students take part in this process as it will help to improve the learning of the students in the society. Teachers can post projects and homework for students on the given website for other students from all other schools to have access to. Also the best projects can be posted to encourage students and give them examples of how to do assignments.

Teacher should be assigned duties where students can be able to ask questions and have a given answer within a reasonable time frame. Teachers should also have access to relevant teaching and learning materials to adequately enable them answer specific questions.
