Dear Sir,

Annex C, Infrastructure Sharing Regulations

Further to your request for initial comments on the new “Regulatory Instruments” including the *Infrastructure Sharing Regulations* I hereby submit the following three comments.

1. There are no provisions in the *Infrastructure Sharing Regulations* for access to sites by licensed amateur radio operators, who are members of recognized amateur radio clubs, for purposes of emergency communications.
2. Licensed amateur radio operators, who are members of recognized amateur radio clubs, should be allowed to collocate on existing sites and towers for the installation of club-owned repeaters and antennas which operate on the amateur bands.
3. Licensed amateur radio operators should be allowed access to existing sites for the purposes of emergency communications in the aftermath of natural or man-made disasters.

I trust that these comments will be considered by ECTEL.

Best regards,

Anselm Gittens, J69AH
